

## Authors

### **William A. Clark**

*Systems Development Division, Development Laboratory, Poughkeepsie, New York.*

Mathematics (B.S., Ohio State University, 1960). Ohio State University Computation Laboratory. State of Ohio Department of Finance, Data Processing Center for two years. Joined IBM in 1962; worked on 1410 iocs and the 1410 Operating System. Participated in the early development of os/360 data management. Presently in an advanced systems planning group.

### **George H. Mealy**

*Systems Development Division, Development Laboratory, Poughkeepsie, New York.*

Physics (A.B., Harvard College, 1951). Eight years with Bell Telephone Laboratories in logic design, switching theory and programming. Four years at the RAND Corporation in computer sciences. After joining IBM in 1963, worked on architecture of Operating System/360. Presently manager of advanced systems planning, programming department.

### **Bernard I. Witt**

*Federal Systems Division, Federal Systems Center, Bethesda, Maryland.*

Mathematics (M.A., University of Wisconsin, 1951). Mathematician, National Security Agency (1951-1960). Joined IBM in 1960, manager of systems support, Project Mercury. Active in os/360 control program development and, currently, manager of a special multiprocessing effort.
