TABLE OF CONTENTS

1. Commands and Application Programs

intro . . . . . introduction to commands
ac . . . . . login accounting
adb . . . . . debugger
ar . . . . . archive and library maintainer
ar11 . . . . . PDP-11 compatible archive and library maintainer
arcv . . . . . convert archives to new format
as . . . . . assembler
at . . . . . execute commands at a later time
awk . . . . . pattern scanning and processing language
basename . . . . . strip filename affixes
bc . . . . . arbitrary-precision arithmetic language
cal . . . . . print calendar
calendar . . . . . reminder service
call . . . . . ring a telephone
cat . . . . . catenate and print
cb . . . . . C program beautifier
cc . . . . . C compiler
cd . . . . . change working directory
chmod . . . . . change mode
chown . . . . . change owner or group
clri . . . . . clear i-node
cmp . . . . . compare two files
col . . . . . filter reverse line feeds
comm . . . . . select or reject lines common to two sorted files
cp . . . . . copy
cron . . . . . clock daemon
crypt . . . . . encode/decode
cu . . . . . call UNIX
date . . . . . print and set the date
dc . . . . . desk calculator
dcheck . . . . . file system directory consistency check
dd . . . . . convert and copy a file
deroff . . . . . remove nroff, troff, tbl and eqn constructs
df . . . . . disk free
diff . . . . . differential file comparator
diff3 . . . . . 3-way differential file comparison
du . . . . . summarize disk usage
dump . . . . . incremental file system dump
dumpdir . . . . . print the names of files on a dump tape
echo . . . . . echo arguments
ed . . . . . text editor
eqn . . . . . typeset mathematics
expr . . . . . evaluate arguments as an expression
f77 . . . . . Fortran 77 compiler
file . . . . . determine file type
find . . . . . find files
graph . . . . . draw a graph
grep . . . . . search a file for a pattern
icheck . . . . . file system storage consistency check
iostat . . . . . report I/O statistics
join . . . . . relational database operator
kill . . . . . terminate a process with extreme prejudice
ld . . . . . link editor

learn . . . . . computer aided instruction about UNIX
lex . . . . . generator of lexical analysis programs
lint . . . . . a C program verifier
ln . . . . . make a link
login . . . . . sign on
look . . . . . find lines in a sorted list
lorder . . . . . find ordering relation for an object library
lpr . . . . . line printer spooler
ls . . . . . list contents of directory
m4 . . . . . macro processor
mail . . . . . send or receive mail among users
make . . . . . maintain program groups
man . . . . . print sections of this manual
mesg . . . . . permit or deny messages
mkdir . . . . . make a directory
mkfs . . . . . construct a file system
mknod . . . . . build special file
mount . . . . . mount and dismount file system
mv . . . . . move or rename files
ncheck . . . . . generate names from i-numbers
newgrp . . . . . log in to a new group
nice . . . . . run a command at low priority
nm . . . . . print name list
nohup . . . . . run a command immune to hangups
number . . . . . convert Arabic numerals to English
od . . . . . octal dump
passwd . . . . . change login password
plot . . . . . graphics filters
pr . . . . . print file
prof . . . . . display profile data
ps . . . . . process status
pstat . . . . . print system facts
ptx . . . . . permuted index
pwd . . . . . working directory name
quot . . . . . summarize file system ownership
ratfor . . . . . rational Fortran dialect
rc . . . . . Ratfor compiler
refer . . . . . find and insert literature references in documents
restor . . . . . incremental file system restore
rev . . . . . reverse lines of a file
rm . . . . . files
sa . . . . . system accounting
sdb . . . . . C symbolic debugger
sed . . . . . stream editor
sh . . . . . command language
size . . . . . size of an object file
sleep . . . . . suspend execution for an interval
sort . . . . . sort or merge files
spell . . . . . find spelling errors
spline . . . . . interpolate smooth curve
split . . . . . split a file into pieces
strip . . . . . remove symbols and relocation bits
struct . . . . . structure Fortran programs
stty . . . . . set terminal options
su . . . . . substitute user id temporarily
sum . . . . . sum and count blocks in a file

sync . . . . . update the super block
tabs . . . . . set terminal tabs
tail . . . . . deliver the last part of a file
tar . . . . . tape archiver
tbl . . . . . format tables for nroff or troff
tc . . . . . photypesetter simulator
tee . . . . . pipe fitting
test . . . . . condition command
time . . . . . time a command
tk . . . . . paginator for the Tektronix 4014
touch . . . . . update date last modified of a file
tp . . . . . manipulate tape archive
tr . . . . . translate characters
troff . . . . . text formatting and typesetting
true . . . . . provide truth values
tsort . . . . . topological sort
tty . . . . . get terminal name
uniq . . . . . report repeated lines in a file
units . . . . . conversion program
uucp . . . . . unix to unix copy
uudiff . . . . . directory comparison between machines
uulog . . . . . uucp user log inquiry
uux . . . . . unix to unix command execution
wait . . . . . await completion of process
wall . . . . . write to all users
wc . . . . . word count
who . . . . . who is on the system
write . . . . . write to another user
xsend . . . . . secret mail
yacc . . . . . yet another compiler-compiler

2. System Calls

intro . . . . . introduction to system calls and error numbers
access . . . . . determine accessibility of file
acct . . . . . turn accounting on or off
alarm . . . . . schedule signal after specified time
brk . . . . . change core allocation
chdir . . . . . change default directory
chmod . . . . . change mode of file
chown . . . . . change owner and group of a file
close . . . . . close a file
creat . . . . . create a new file
dup . . . . . duplicate an open file descriptor
exec . . . . . execute a file
exit . . . . . terminate process
fork . . . . . spawn new process
getpid . . . . . get process identification
getuid . . . . . get user and group identity
indir . . . . . indirect system call
ioctl . . . . . control device
kill . . . . . send signal to a process
link . . . . . link to a file
lseek . . . . . move read/write pointer
mknod . . . . . make a directory or a special file
mount . . . . . mount or remove file system
mpx . . . . . create and manipulate multiplexed files

nice . . . . . set program priority
open . . . . . open for reading or writing
pause . . . . . stop until signal
pipe . . . . . create an interprocess channel
profil . . . . . execution time profile
ptrace . . . . . process trace
read . . . . . read from file
setuid . . . . . set user and group ID
signal . . . . . catch or ignore signals
stat . . . . . get file status
stime . . . . . set time
stty . . . . . set and retrieve terminal modes
sync . . . . . update super-block
time . . . . . get date and time
times . . . . . get process times
umask . . . . . set file creation mode mask
unlink . . . . . remove directory entry
utime . . . . . set file times
wait . . . . . wait for process to terminate
write . . . . . write on a file

3. Subroutines

intro . . . . . introduction to library functions
abort . . . . . generate a fault
abs . . . . . integer absolute value
assert . . . . . program verification
atof . . . . . convert ASCII to numbers
crypt . . . . . DES encryption
ctime . . . . . convert date and time to ASCII
ctype . . . . . character classification
dbm . . . . . data base subroutines
ecvt . . . . . output conversion
end . . . . . last locations in program
exp . . . . . exponential, logarithm, power, square root
fclose . . . . . close or flush a stream
ferror . . . . . stream status inquiries
floor . . . . . absolute value, floor, ceiling functions
fopen . . . . . open a stream
fread . . . . . buffered binary input/output
frexp . . . . . split into mantissa and exponent
fseek . . . . . reposition a stream
gamma . . . . . log gamma function
getarg . . . . . command arguments to Fortran
getc . . . . . get character or word from stream
getenv . . . . . value for environment name
getgrent . . . . . get group file entry
getlogin . . . . . get login name
getpass . . . . . read a password
getpw . . . . . get name from UID
getpwent . . . . . get password file entry
gets . . . . . get a string from a stream
hypot . . . . . euclidean distance
j0 . . . . . bessel functions
l3tol . . . . . convert between 3-byte integers and long integers
malloc . . . . . main memory allocator
mktemp . . . . . make a unique file name

monitor . . . . . prepare execution profile
nlist . . . . . get entries from name list
perror . . . . . system error messages
plot . . . . . graphics interface
popen . . . . . initiate I/O to/from a process
printf . . . . . formatted output conversion
putc . . . . . put character or word on a stream
puts . . . . . put a string on a stream
qsort . . . . . quicker sort
rand . . . . . random number generator
scanf . . . . . formatted input conversion
setbuf . . . . . assign buffering to a stream
setjmp . . . . . non-local goto
sin . . . . . trigonometric functions
sinh . . . . . hyperbolic functions
sleep . . . . . suspend execution for interval
stdio . . . . . standard buffered input/output package
string . . . . . string operations
swab . . . . . swap bytes
system . . . . . issue a shell command
ttyname . . . . . find name of a terminal
ungetc . . . . . push character back into input stream

4. Special Files

cat . . . . . phototypesetter interface
dc . . . . . DC-11 communications interface
dh . . . . . DH-11 communications multiplexer
dn . . . . . DN-11 ACU interface
dp . . . . . DP-11 201 data-phone interface
dz . . . . . DZ-11 communications multiplexer
hp . . . . . RH-11/RP04, RP05, RP06, RM03 moving-head disk
hs . . . . . RH11/RS03-RS04 fixed-head disk file
ht . . . . . RH-11/TE-16 magtape interface
kl . . . . . KL-11 or DL-11 asynchronous interface
lp . . . . . line printer
mem . . . . . main memory
null . . . . . data sink
pc . . . . . PC-11 paper tape reader/punch
rf . . . . . RF11/RS11 fixed-head disk file
rk . . . . . RK-11/RK03 or RK05 disk
rp . . . . . RP-11/RP03 moving-head disk
tc . . . . . TC-11/TU56 DECtape
tm . . . . . TM-11/TU-10 magtape interface
tty . . . . . general terminal interface
vp . . . . . Versatec printer-plotter

5. File Formats

a.out . . . . . assembler and link editor output
acct . . . . . execution accounting file
ar . . . . . file format
core . . . . . format of memory image file
dir . . . . . format of directories
dump . . . . . incremental dump format
environ . . . . . user environment
filsys . . . . . format of file system volume

group . . . . . group file
mpxio . . . . . multiplexed i/o
mtab . . . . . mounted file system table
passwd . . . . . password file
plot . . . . . graphics interface
tp . . . . . DEC/mag tape formats
ttys . . . . . terminal initialization data
types . . . . . primitive system data types
utmp . . . . . login records
wtmp . . . . . user login history

6. Games

arithmetic . . . . . provide drill in number facts
backgammon . . . . . the game
bcd . . . . . convert to antique media
ching . . . . . the book of changes and other cookies
hangman . . . . . guess the word
maze . . . . . generate a maze problem
quiz . . . . . test your knowledge
wump . . . . . the game of hunt-the-wumpus

7. Miscellaneous

ascii . . . . . map of ASCII character set
eqnchar . . . . . special character definitions for eqn
greek . . . . . graphics for extended TTY-37 type-box
hier . . . . . file system hierarchy
man . . . . . macros to typeset manual
ms . . . . . macros for formatting manuscripts
term . . . . . conventional names

8. System Maintenance

bproc . . . . . UNIX/32V startup
crash . . . . . what to do when the system crashes
cron . . . . . clock daemon
fget.demon . . . . . fget daemons
getty . . . . . set terminal mode
init . . . . . process control initialization
lpd . . . . . line printer daemon
makekey . . . . . generate encryption key
sticky . . . . . executable files with persistent text
sysgen . . . . . UNIX/32V system generation from the distribution tape
update . . . . . periodically update the super block
